AIR LOGIC SOLUTIONS ANNOUNCES ARG/US PLATINUM SAFETY RATING

Tampa, Florida – June 27, 2003 – Air Logic Solutions, an aircraft charter/ management and aviation consulting company announced its Platinum Rating from the Aviation Research Group/US (ARG/US). This is the highest safety rating awarded by ARG/US and is only given to those companies that undergo and pass a vigorous on-site safety audit of its operations. The ARG/US Platinum Rating is the second safety acknowledgement Air Logic Solutions has received in the last few months. In June of this year Wyvern Aviation, Ltd. conducted another rigorous on-site safety audit which resulted in their highly sought after recommendation. Air Logic Solutions is the only company in the State of Florida to receive both of these safety ratings.

Air Logic Solutions, headquartered in Tampa, is currently providing worldwide air charter, aircraft management and aviation consulting services. Air Logic owns and manages a fleet of state-of-the-art Challenger 604, Beechjet 400A and King Air aircraft.

“As a global travel leader, we are constantly looking for ways to meet the needs of our clients. The ARG/US and Wyvern on-site audits are the ‘gold standard’ of Part 135 air carrier certifications. Having the ARG/US Platinum Rating and the Wyvern recommendation validates Air Logic’s operating methods and processes. We are proud of the fact that we have successfully married major airlines methods of flight standards and safety with the service level found in corporate flight departments in fortune 100 companies.” said John N. Fenton, Director of Operations of Air Logic Solutions. When asked how these safety ratings have affected business, Mr. Fenton replied “Our business is constantly increasing due to the fact that we continually exceed our customers’ expectations in service and safety. When travelers are choosing an air carrier, the ARG/US and Wyvern ratings carry a lot of weight. If a carrier does not have these ratings there is usually a reason why. Our customers know and appreciate the difference.”

About Air Logic Solutions

The mission of Air Logic Solutions is to be Florida's premier corporate aviation company with its primary objective of *consistently exceeding our customer's expectations*. We are committed to bringing the highest standards of safety and service to the private air carrier, aircraft charter, aircraft management, brokerage and aviation consulting markets.

Air Logic Solutions is the leader in aircraft management and air charter businesses in West-Central Florida. We are the largest FAA and DOT Part 135 certified air carrier in the Tampa Bay area. We believe that safety, blended with excellent service is the foundation for a successful air charter business.

Safety is our number one priority. All of our aircraft are maintained under Factory approved programs, which meet or exceed FAA requirements. Our pilots are highly experienced and exceptionally well qualified. We require our crews to be trained to equivalent standards as those maintained by major airlines. Our Captains average 6500 hours of flight time and First Officers average more than 3000 hours of flight time. Our crews are trained at FlightSafety International twice annually. The FAA or its designee also tests our crews every 6 months.

About ARG/US

Aviation Research Group/US is the leader in the field of corporate aviation safety and operational information. Responding to an industry-wide need for objective, non-intrusive, and fact based safety analysis for Part 135 charter operators, ARG/US uses a rating system to help businesses and individuals that use charter companies to evaluate the safety of their operations. ARG/US has earned a well-established and respected reputation in the aviation industry for aviation safety focus. This reputation and safety focus has attracted managers of corporate risk, corporate security and corporate flight departments to use ARG/US as an integral part of their due diligence process when they select qualified operators to fulfill their charter needs.
